

**Homemade Soda Water.**—A syrup can be made at home and soda water prepared at any time. Boil together for three minutes, two ounces of tartaric acid, one quart of sugar, the juice of one lemon, and three pints of water. When partly cool, beat in the well-beaten whites of three eggs into which has been smoothly blended one-half cupful of flour and one-half an ounce of wintergreen or other flavor. Keep in a cool place. When needed, shake the bottle well, and put two table-spoonfuls of the syrup in a glass of ice water, then add one-fourth of a teaspoonful of soda, stirring rapidly.
